FIVICS PRODUCT GUIDE

FIVICS

STORY OF TEAM FIVICS IN 2017

We appreciate and thank our archers for the great year of 2016 and 2017.

In 2016, the Fivics pro staff team have performed extraordinarily in the Rio Olympics and World Championships. In 2017, Fivics shooters our team has succeeded in the World Championships in Mexico with a gold medal. Going into 2018, we look forward to seeing even better results with our improving products. From the start, our goal is to make YOU the best in the world!

The Best Shooters, The Greatest Moments and The Finest Victory!

Fivics would like to thank all Fivics shooters and supporters of our equipment. To make the best moment, Fivics continues to research, produce and shoot with you.

We are proud to present the new 2018 Fivics equipment line to you!

NEW TECHNOLOGY OF TITAN EX RISER

FIVICS ARCHERY
TITANEX

TSG TIGHT AND SECURE GRIP | 3 important points in grip system

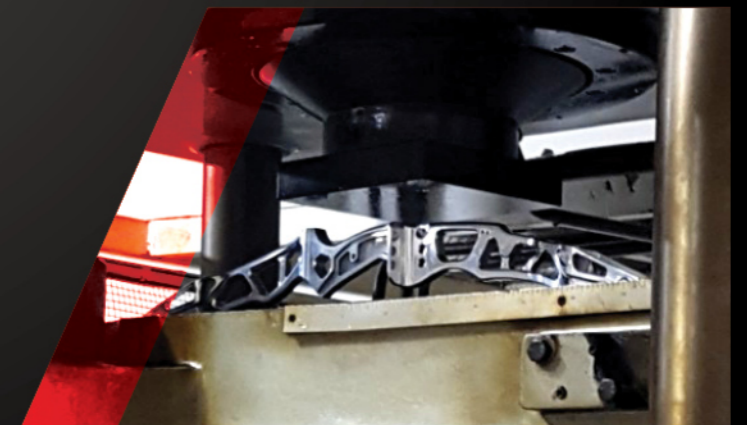

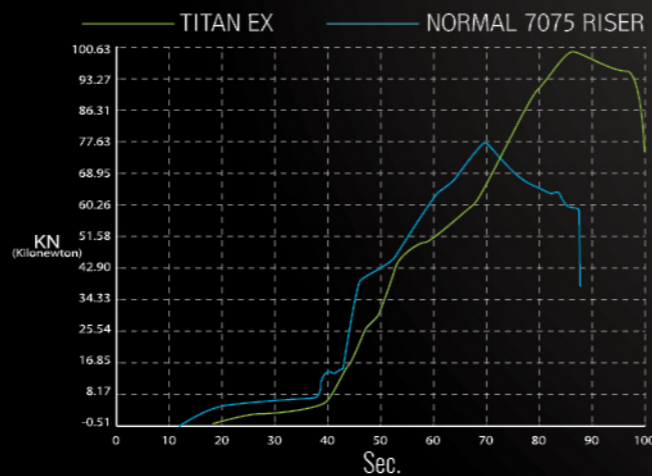

STABLE & STEADY GEOMETRY

The Titan EX's design purpose is to maximize the speed of the arrow. With the perfect centroidal balance design and the TSG (tight and secure grip), we have achieved great stability and arrows can be controlled better at high speeds

7075 RISER VS EX 6061 RISER

The Titan EX riser is designed with aluminum 6061 to allow the best vibration absorption possible. Using hydraulic press machine, we have scientifically proven that our 6061 riser can tolerate higher pressure than risers made from the more rigid materials like the 7075 aluminum

TITAN EX

Unlimited improvement

Fivics is the only archery company you can trust to endlessly challenge themselves. They have a fiery passion to make you say "Fivics will always makes new revolutionary ideas"

Precision made

HX0525 » TITAN EX RISER

- Superfine CNC milling
- Special unique designed wooden grip
- Meticulous and Precise production
- Perfect centroidal balance
- Flawless coating
- Deep color from anodizing
- Aesthetically brilliant painting

TECHNOLOGY OF TITAN EX LIMBS

Stability / Accuracy / higher durability

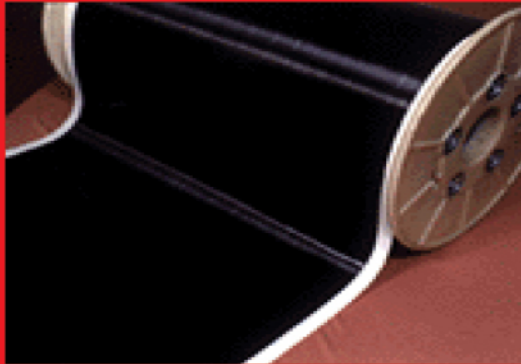

SKY FLEX CWP CARBON PREPREG MATERIAL

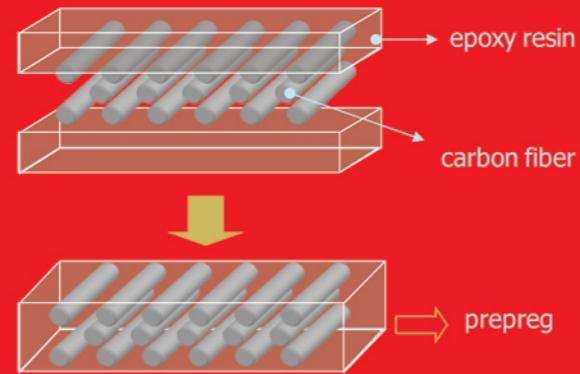

With the cooperation of Fivics Archery and SK Chemical, we have developed the best and unique Carbon "PrePreg material" for archery. This material allows efficient pull kinetics and quick restoration.

- ▶ The most important thing in archery, Limbs is carbon's raw material
- ▶ In the process of producing good carbon materials, prepreg technology of epoxy and carbon fiber is proportional to the tension and torsion of the limbs.

Prepreg = Pre + Impregnated Material

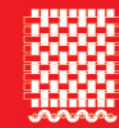

SKY FLEX = Natural Flex fiber + Epoxy Resin

Carbon Material by SK Chemical

Increased stiffness but saved the same stability and uniform elasticity of the limb by cooperation between Fivics, and SK chemical

Plane Weave

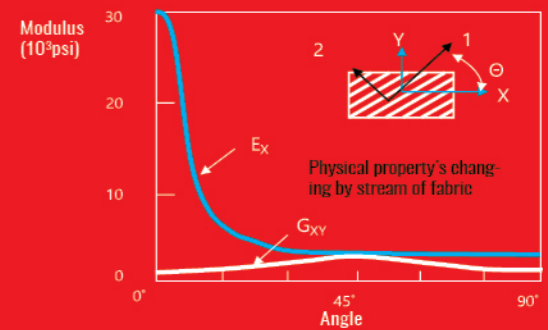

Low Drapeability
High Crimp
Good Decoration

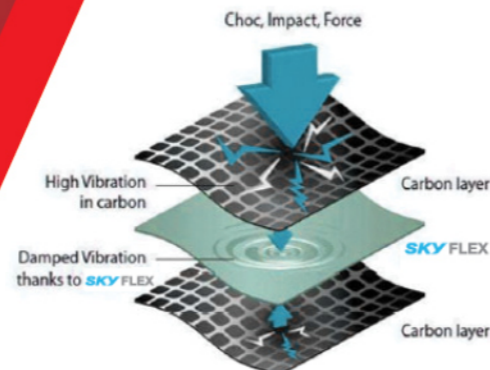

TITAN EX LIMBS - Surprising effect of 45 degrees carbon technology

The glass fiber is used to protect the carbon but this combination reduces arrow speed due to the heavy mass weight. On the other hand, 45 degrees carbon system increases shooting stability, protecting carbon as well as reinforcing anti-twisting.

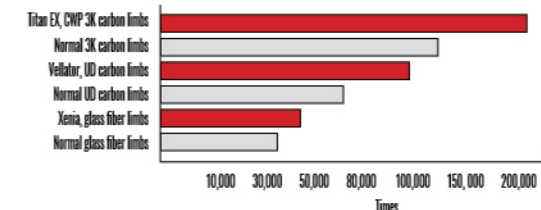

R-TECH

We utilized the CWP carbon fiber, which has a specially staggered layer structure to reduce torsion of the limb and to efficiently absorb vibration during the shot.

Increased stiffness but saved the same stability and uniform elasticity of the limb.

Dry fire testing for breaking and strength of limbs

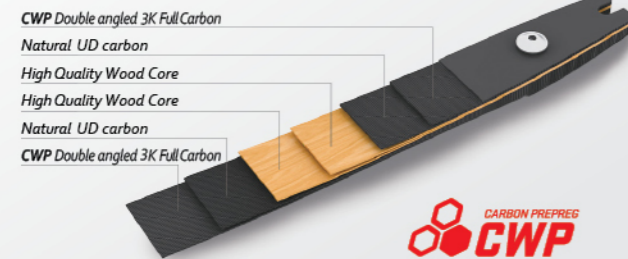

TITAN EX WOOD CORE LIMBS

LXWC01 » TITAN EX WOOD CORE LIMBS

- Clean and powerful shooting
- New Material : CWP carbon
- Light weight
- Improved limb tip design

MATERIAL » CWP 3K Full Carbon
 CORE » Wood core
 BOW LENGTH » 66",68",70"
 DRAW WEIGHT(lbs.) » 32#-50# (2# increments)

Fivics limbs follow the international limb fitting system (ILF) and are guaranteed to fit in all Fivics risers and others.

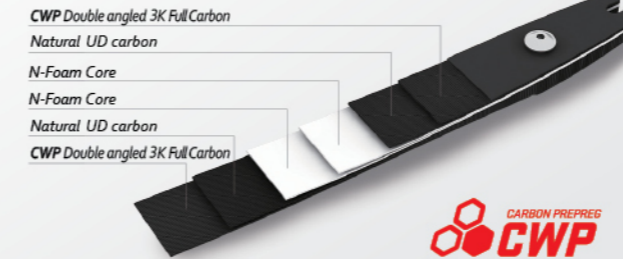

TITAN EX FOAM CORE LIMBS

LXCF01 » TITAN EX FOAM CORE LIMBS

- Clean and powerful shooting
- New Material : CWP carbon
- Light weight
- Improved limb tip design

MATERIAL » CWP 3K Full Carbon
 CORE » Foam core
 BOW LENGTH » 66",68",70"
 DRAW WEIGHT(lbs.) » 32#-50# (2# increments)

Fivics limbs follow the international limb fitting system (ILF) and are guaranteed to fit in all Fivics risers and others.

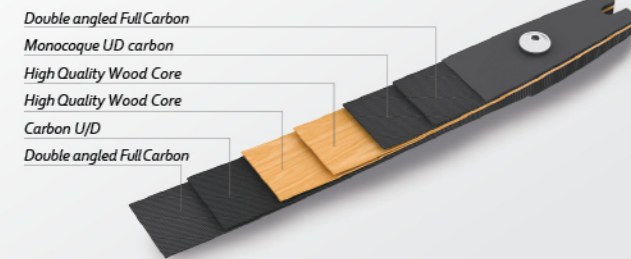

TITAN X2 WOOD CORE LIMBS

LTWC01 » TITAN X2 WOOD CORE LIMBS

- Clean and powerful shooting
- New Material : MONOCOQUE UD carbon
- Light weight
- Improved limb tip design

MATERIAL » Double angled Full Carbon
 CORE » Wood core
 BOW LENGTH » 66",68",70"
 DRAW WEIGHT(lbs.) » 32#-50# (2# increments)

Fivics limbs follow the international limb fitting system (ILF) and are guaranteed to fit in all Fivics risers and others.

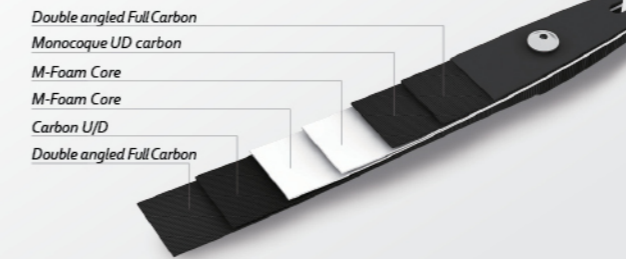

TITAN X2 FOAM CORE LIMBS

SAKER SERIES

SFT04A » Saker+ Plus finger tab

SIZE » L / M / S (RH is new model, but LH is old version in 2016)

Saker+ Plus finger tab is 4mm thick, allows 3 weight control systems and 5 angle adjustment system through precise machining of the aluminum plate.

Saker+ Plus finger tab can be adjusted to fit the archers shape and preference to allow more stable hooking position, making it the best tab to shoot perfectly in any competition.

And also, it is very easy to cover the special parts for the thumb and little finger.

We at Fivics understand that shooters have different preferences and we will thrive to consider all of them.

Saker + Plus finger tab's spacer is designed to bend to your preferred hand shape for more comfortable shots. It also looks like an elephant!

Fivics is using high quality cordovan leathers only which is provided by H company with one hundred years history in U.S.A

XENIA™
ARCHERY

“Everyone can enjoy Archery”

In April 2015, the Fivics archery center was launched with a dream to allow anyone, including non-athletic people, to enjoy archery. Now, we are making that dream a reality. The new Krossen line allows us to say “Everyone can enjoy archery with top quality and beautifully designed equipment!”. In the past, beginners or intermediate archers did not much choice. But now, that has changed. We at Fivics thrive to make more options for everyone who love archery as we do.
